### Warning

#### This apparatus must be earthed for your safety.

To ensure safe operation the three-pin plug must be inserted only into a standard three-pin power point which is effectively earthed through the normal household wiring.

Extension cords used with the equipment must be three-core and be correctly wired to provide connection to earth. Wrongly wired extension cords are a major cause of fatalities.

The fact that the equipment operates satisfactorily does not imply that the power point is earthed and that the installation is completely safe.

For your safety, if you have any doubt about the effective earthing of the power point, consult a qualified electrician.

### FOR YOUR SAFETY PLEASE READ THE FOLLOWING TEXT CAREFULLY

This appliance is supplied with a moulded three pin mains plug for your safety and convenience. A 3 amp fuse is fitted in this plug.

Should the fuse need to be replaced please ensure that the replacement fuse has a rating of 3 amps and that it is approved by ASTA or BSI to BS 1362.

Check for the ASTA mark  or the BSI mark  on the body of the fuse.

If the plug contains a removable fuse cover you must ensure that it is refitted when the fuse is replaced.

If you lose the fuse cover the plug must not be used until a replacement cover is obtained.

A replacement fuse cover can be purchased from your local Panasonic Dealer.

IF THE FITTED MOULDED PLUG IS UNSUITABLE FOR THE SOCKET OUTLET IN YOUR HOME THEN THE FUSE SHOULD BE REMOVED AND THE PLUG CUT OFF AND DISPOSED OF SAFELY. THERE IS A DANGER OF SEVERE ELECTRICAL SHOCK IF THE CUT OFF PLUG IS INSERTED INTO ANY 13 AMP SOCKET.

If a new plug is to be fitted please observe the wiring code as shown below. If in any doubt please consult a qualified electrician.

**Warning: THIS APPLIANCE MUST BE EARTHED.**

<sup>\*1</sup> AIRCRAFT COCKPIT EQUIPMENT/SYSTEMS include Class2 Electrical Flight Bag (EFB) Systems and Class1 EFB Systems when used during critical phases of flight (e.g., during take-off and landing) and/or mounted on to the aircraft. Class1 EFB Systems and 2 EFB Systems are defined by FAA: AC (Advisory Circular) 120-76A or JAA: JAA TGL (Temporary Guidance Leaflets) No.36.

Panasonic cannot guarantee any specifications, technologies, reliability, safety (e.g. Flammability/Smoke/Toxicity/Radio Frequency Emission, etc) requirements related to aviation standards that exceed the specifications of our COTS (Commercial-Off-The-Shelf) products.

This wireless display is not intended for use in medical equipment including life-support systems, air traffic control systems, or other equipment, devices or systems that are involved with ensuring human life or safety. Panasonic cannot be held responsible in any way for any damages or loss resulting from the use of this wireless display in these types of equipment, devices or systems, etc.

The CF-08 was developed based on thorough research into the real-world portable computing environments. Exhaustive pursuit of usability and reliability under harsh conditions led to innovations such has the magnesium alloy exterior and flexible internal connections. The CF-08's outstanding engineering has been tested using the strict MIL-STD- 810F (for vibration and shock) and IP (for dust and water) based procedures.

As with any portable wireless display device precautions should be taken to avoid any damage. The following usage

and handling procedures are recommended.

Before putting the wireless display away, be sure to wipe off any moisture.

### If a Malfunction Occurs, Immediately Unplug the AC Cord and the Battery Pack

- Wireless display is damaged
- Foreign object inside wireless display
- Smoke emitted
- Unusual smell emitted
- Unusually hot

Continuing to use the wireless display while any of the above conditions are present may result in fire or electric shock.

- If a malfunction occurs, immediately turn the power off and unplug the AC cord, and then remove the battery pack.

### Do Not Touch the Wireless Display and Cable When It Starts Thundering

Electric shock may result.

## **Do Not Connect the AC Adaptor to a Power Source Other Than a Standard Household AC Outlet**

Otherwise, a fire due to overheating may result. Connecting to a DC/AC converter (inverter) may damage the AC adaptor. On an airplane, only connect the AC adaptor/charger to an AC outlet specifically approved for such use.

## **Do Not Do Anything That May Damage the AC Cord, the DC Plug, or the AC Adaptor**

Do not damage or modify the cord, place it near hot tools, bend, twist, or pull it forcefully, place heavy objects on it, or bundle it tightly.

Continuing to use a damaged cord may result in fire, short circuit, or electric shock.

## **Do Not Pull or Insert the DC Plug If Your Hands Are Wet**

Electric shock may result.

## **Clean the DC Plug of Dust and Other Debris Regularly**

If dust or other debris accumulates on the plug, humidity, etc. may cause a defect in the insulation, which may result in a fire.

- Pull the plug, and wipe it with a dry cloth. Pull the plug if the wireless display is not being used for a long period of time.

## **Insert the AC Plug Completely**

If the plug is not inserted completely, fire due to overheating or electric shock may result.

- Do not use a damaged plug or loose AC outlet.

## **Do Not Disassemble the Wireless Display**

There are high-voltage areas inside which may give you an electric shock if you should touch them. Do not touch the pins and circuit boards inside, and do not allow foreign matter to enter inside.

Also, remodeling or disassembly may cause a fire.

## **Keep SD Memory Cards Away from Infants and Small Children**

Accidental swallowing will result in bodily injury.

In the event of accidental swallowing, see a doctor immediately.

## **Do Not Place the Wireless Display on Unstable Surfaces**

If balance is lost, the wireless display may fall over or drop, resulting in an injury.

## **Avoid Stacking**

If balance is lost, the wireless display may fall over or drop, resulting in an injury.

## **Do Not Leave the Wireless Display in High Temperature Environment Such as in a Sun-Heated Car, for a Long Period of Time**

Leaving the wireless display where it will be exposed to extremely high temperatures such as in a sun-heated car or in direct sunlight may deform the cabinet and/or cause trouble in the internal parts. Continued use in such a resulting condition may lead to short-circuiting or insulation defects, etc. which may in turn lead to a fire or electric shocks.

## **Hold the Plug When Unplugging the AC Cord**

Pulling on the cord may damage the cord, resulting in a fire or electric shock.

## **Do Not Move the Wireless Display While the DC Plug Is Connected**

The AC cord may be damaged, resulting in fire or electric shock.

- If the AC cord is damaged, unplug the DC plug immediately.

# Precautions

## Use Only the Specified AC Adaptor With Your Wireless Display

Using an AC adaptor other than the one supplied (attached to your wireless display or supplied by Panasonic) may result in a fire.

## Do Not Subject the AC Adaptor to Any Strong Impact

Using the AC adaptor after a strong impact such as being dropped may result in electric shock, short circuit, or fire.

## Take a Break of 10-15 Minutes Every Hour

Using the wireless display for long periods of time may have detrimental health effects on the eyes or hands.

## Do Not Turn the Volume Up to Loud When Using Headphones

Listening at high volumes that overstimulate the ear for long periods of time may result in loss of hearing.

## Do Not Connect a Telephone Line, or a Network Cable Other Than the One Specified, into the LAN Port

If the LAN port is connected to a network such as the ones listed below, a fire or electric shock may result.

- Networks other than 100BASE-TX or 10BASE-T
- Phone lines (Telephone lines, internal phone lines (on-premise switches), digital public phones, etc.)

## Do Not Use with Exposing the Skin to the Wireless Display for a Long Period of Time

Using the wireless display with exposing the skin to the heat source of the wireless display or AC adaptor for a long period of time can cause a low-temperature burn.

- Do not place the wireless display near a television or radio receiver.

## Battery Pack

### Do Not Use with Any Other Wireless Display

The battery pack is rechargeable and was intended for the specified wireless display. If it is used with a wireless display other than the one for which it was designed, electrolyte leakage, generation of heat, ignition or rupture may result.

### Do Not Charge the Battery Using the Methods Other Than Indicated in This Manual

If the battery pack is not charged using one of the methods indicated in this manual, electrolyte leakage, generation of heat, ignition or rupture may result.

### Do Not Throw the Battery Pack into a Fire or Expose It to Excessive heat

Generation of heat, ignition or rupture may result.

### Avoid Extreme Heat (Near the Fire, in Direct Sunlight, for Example)

Electrolyte leakage, generation of heat, ignition or rupture may result.

### Do Not Insert Sharp Objects into the Battery Pack, Expose It to Bumps or Shocks, Disassemble, or Modify It

Electrolyte leakage, generation of heat, ignition or rupture may result.

## **Do Not Short the Positive (+) and Negative (-) Contacts**

Generation of heat, ignition or rupture may result. Do not place the battery pack together with articles such as necklaces or hairpins when carrying or storing.

## **Do Not Use This Wireless Display with a Battery Pack Other Than the One Specified**

Use only the specified battery pack (CF-VZSU44) with your CF-08. Use of battery packs other than those manufactured and supplied by Panasonic may present a safety hazard (generation of heat, ignition or rupture).

- Do not touch the terminals on the battery pack. The battery pack may no longer function properly if the contacts are dirty or damaged.
- Do not expose the battery pack to water, or allow it to become wet.
- If the battery pack will not be used for a long period of time (a month or more), charge or discharge (use) the battery pack until the remaining battery level becomes 30% to 40% and store it in a cool, dry place.
- This wireless display prevents overcharging of the battery by recharging only when the remaining power is less than approx. 95% of capacity.
- The battery pack is not charged when the wireless display is first purchased. Be sure to charge it before using it for the first time. When the AC adaptor is connected to the wireless display, charging begins automatically.
- Should the battery leak and the fluid get into your eyes, do not rub your eyes. Immediately flush your eyes with clear water and see a doctor for medical treatment as soon as possible.

### **NOTE**

- The battery pack may become warm during recharging or normal use. This is completely normal.
- Recharging will not commence if internal temperature of the battery pack is outside of the allowable temperature range (0 °C to 45 °C {32°F to 122°F}). Once the allowable range requirement is satisfied, charging begins automatically. Note that the recharging time varies based on the usage conditions. (Recharging takes longer than usual when the temperature is 10 °C {50°F} or below.)
- If the temperature is low, the operating time is shortened. Only use the equipment within the allowable temperature range.
- The battery pack is a consumable item. If the amount of time the equipment can be run by using a particular battery pack becomes dramatically shorter and repeated recharging does not restore its performance, the battery pack should be replaced with a new one.
- When transporting a spare battery inside a package, briefcase, etc., it is recommended that it be placed in a plastic bag so that its contacts are protected.
- Always power off the equipment when it is not in use. Leaving the equipment on when the AC adaptor is not connected will exhaust the remaining battery capacity.

# For Effective Use

## Maintenance

### ■ LCD

Do not use water when cleaning the panel. Ingredients included in water may leave residue and reduce readability of the screen.

<When cleaning dust/dirt>

Avoid rubbing off dust/dirt with cloth since it may leave scratch on the screen. Sweep dust/dirt with fine brush, then wipe it with "dry" soft cloth used for cleaning glasses.

<When cleaning oily surface>

Apply camera lens cleaner on a soft gauze and clean it with gentle force. Then, wipe with dry soft cloth used for cleaning glasses.

### ■ Areas excluding the LCD

Wipe these areas with a soft cloth, after applying water or detergent diluted with water to the soft cloth and firmly wringing out excess water.

#### CAUTION

- Do not use benzene, thinner, or rubbing alcohol. Doing so may adversely affect the surface, e.g., discoloration. In addition, do not use commercially-available household cleaners and cosmetics, as they may contain components harmful to the surface.
- Do not directly add or spray water or detergent. If liquid enters the inside of the wireless display, it may cause the wireless display to work improperly or be damaged.

Vous êtes autorisé à céder de manière permanente tous vos droits mentionnés dans ce CLUF uniquement dans le cadre d'une vente ou cession définitive de l'APPAREIL, à condition que vous ne conserviez aucune copie du LOGICIEL. Si le LOGICIEL est une mise à niveau, toute cession doit également inclure toutes les versions antérieures du LOGICIEL. Cette session doit aussi inclure l'étiquette du Certificat d'Authenticité. La cession ne peut pas être une cession indirecte, comme par exemple une consignation. Avant la cession, l'utilisateur final qui reçoit le LOGICIEL doit accepter tous les termes du CLUF.

- **Consentement à l'utilisation des données.** Vous acceptez que MS, Microsoft Corporation et leurs sociétés affiliées puissent collecter et utiliser des informations techniques rassemblées de quelque manière dans le cadre des services de soutien au produit liés au LOGICIEL. Microsoft Corporation ou ses sociétés affiliées n'utilisent pas ces fonctions pour collecter toute information qui sera utilisée pour vous identifier ou vous contacter. - **Logiciels/services additionnels.** Ce CLUF s'applique aux mises à jour, compléments, composantes complémentaires, services de soutien au produit ou composantes de services Internet (« Composantes supplémentaires ») du LOGICIEL que vous pouvez obtenir de MEI, MS, Microsoft Corporation ou leurs filiales après la date où vous avez obtenu votre copie initiale du LOGICIEL, à moins que vous n'acceptiez les termes actualisés ou qu'un autre contrat ne prévale.

Si d'autres termes n'accompagnent pas lesdites Composantes supplémentaires et que les Composantes supplémentaires vous sont fournies par MS, Microsoft Corporation ou leurs filiales, alors vous serez autorisé par ladite entité sous les mêmes termes et conditions que le présent CLUF, sauf que (i) MS, Microsoft Corporation ou leurs filiales fournissant les Composantes supplémentaires seront le concédant de licence pour lesdites Composantes supplémentaires au lieu de la « COMPAGNIE » pour les fins du CLUF, et que (ii) DANS LA MESURE MAXIMALE PERMISE PAR LA LOI EN VIGUEUR, LES COMPOSANTES SUPPLÉMENTAIRES ET TOUT SERVICE DE SOUTIEN (SI SERVICE IL Y A) LIÉ AUX COMPOSANTES SUPPLÉMENTAIRES SONT FOURNIS TELS QUELS ET AVEC TOUS LEURS DÉFAUTS. Vous n'êtes pas autorisé à louer, prêter ou céder autrement la copie de secours à un autre utilisateur.
- **Preuve de licence d'utilisateur final.** Si vous avez fait l'acquisition du LOGICIEL sur un APPAREIL, ou sur un disque compact ou autre support, une véritable « Preuve de licence »/étiquette de Certificat d'authenticité avec une copie véritable du LOGICIEL identifie une copie sous licence du LOGICIEL. Pour être valide, l'étiquette doit être apposée sur l'APPAREIL ou apparaître sur l'emballage du logiciel de MEI. Si vous recevez l'étiquette séparément, autrement que de MEI, elle n'est pas valide. Vous devez laisser l'étiquette sur l'APPAREIL ou sur l'emballage pour prouver que vous êtes autorisé à utiliser le LOGICIEL.
