Ready, Set Up, Go
Welcome

Congratulations on purchasing a MacBook Air. Your MacBook Air is streamlined for portability and a completely wireless experience. Read this chapter for help setting up and using your MacBook Air.

- If you know you won’t be migrating information from another Mac or Windows computer (PC), and you’d like to get started using your MacBook Air right away, you can follow the Setup Assistant to set up your MacBook Air quickly. For more information, see page 12.

- If you want to migrate information from another Mac or PC to your MacBook Air, you can use Setup Assistant to specify the Mac or PC whose information you want to transfer. For more information, see page 12.

- After you set up your MacBook Air, if you want to get content from DVDs or CDs onto your MacBook Air, you can set up one or more Macs or PCs to partner with your MacBook Air. For more information, see page 15.

You can browse and download free or purchased applications from the Mac App Store, which you can open from Launchpad or your Dock.

*Important:* Read all the installation instructions (and the safety information starting on page 54) carefully before you first use your MacBook Air.

Many answers to questions can be found on your MacBook Air in Help Center. For information about using Help Center, see “Getting Answers” on page 33. Apple may release new versions and updates to its system software, so the images shown in this book may be slightly different from what you see onscreen.
What’s in the Box

Important: Remove the protective film covering the 45W MagSafe Power Adapter before setting up your MacBook Air.

Setting Up Your MacBook Air
Your MacBook Air is designed so that you can set it up quickly and start using it right away. The following pages take you through the setup process, including these tasks:

• Plugging in the 45W MagSafe Power Adapter
• Turning on your MacBook Air
• Using Setup Assistant to access a network and configure a user account and other settings
• Setting up the Mac OS X desktop and preferences
Step 1: **Plug in the 45W MagSafe Power Adapter to provide power to the MacBook Air and charge the battery.**

Make sure the AC plug is fully inserted into the power adapter and the electrical prongs on your AC plug are in their completely extended position. Insert the AC plug of your power adapter into a power outlet and the MagSafe connector into the MagSafe power port. As the MagSafe connector gets close to the port, you’ll feel a magnetic pull drawing it in.

To extend the reach of your power adapter, replace the AC plug with the included AC power cord. First pull the AC plug up to remove it from the adapter, and then attach the AC power cord to the adapter, making sure it’s seated firmly. Plug the other end into a power outlet.

When disconnecting the power adapter from an outlet or from your MacBook Air, pull the plug, not the cord.
When you connect the power adapter to your MacBook Air, the indicator light on the MagSafe connector starts to glow. An amber light indicates that the battery is charging. A green light indicates that the battery is fully charged. If you don’t see a light, make sure the connector is seated properly and the power adapter is plugged into a working power outlet.

**Step 2: Press the power button () briefly to turn on your MacBook Air.**

The power button is located in the upper right corner of your keyboard. When you turn on your MacBook Air, you hear a startup tone.

It takes your MacBook Air a few moments to start up. After it starts up, Setup Assistant opens automatically.

If your MacBook Air doesn’t turn on, see page 40.
Step 3: **Configure your MacBook Air with Setup Assistant.**

The first time you turn on your MacBook Air, Setup Assistant starts. Setup Assistant helps you specify your Wi-Fi network, set up a user account, and transfer information from another Mac or PC. You can also transfer information from a Time Machine backup or other disk.

If you’re migrating from another Mac, you might have to update software if the other Mac doesn’t have Mac OS X version 10.5.3 or later installed. To migrate from a PC, download the Migration Assistant from www.apple.com/migrate-to-mac, and install it on the PC you want to migrate from.

After you start Setup Assistant on your MacBook Air, you can leave it midprocess without quitting, move to the other computer if you need to update its software, and then return to your MacBook Air to complete the setup.

**Note:** If you don’t use Setup Assistant to transfer information when you first start up your MacBook Air, you can do it later using Migration Assistant. Open Migration Assistant in the Utilities folder in Launchpad. For help using Migration Assistant, open Help Center and search for “Migration Assistant.”

**To set up your MacBook Air:**

1. In Setup Assistant, follow the onscreen instructions until you get to the “Transfer Information to This Mac” screen.

2. Do a basic setup, a setup with migration, or transfer information from a Time Machine backup or other disk:
   - *To do a basic setup,* select “Don’t transfer now” and click Continue. Follow the remaining prompts to select your wired or wireless network, set up an account, and exit Setup Assistant.
• To do a setup with migration, select “From another Mac or PC” and click Continue. Follow the onscreen instructions to select the Mac or PC you want to migrate from. Your Mac or PC must be on the same wired or wireless network. Follow the onscreen instructions for migrating.

• To transfer information from a Time Machine backup or another disk, select “From a Time Machine backup or other disk” and click Continue. Select the backup or the other disk that you want to migrate from. Follow the onscreen instructions.

If you don’t intend to keep or use your other computer, it’s best to deauthorize it from playing music, videos, or audiobooks that you’ve purchased from the iTunes Store. Deauthorizing a computer prevents any songs, videos, or audiobooks you’ve purchased from being played by someone else, and frees up another authorization for use. For information about deauthorizing, choose iTunes Help from the Help menu in iTunes.
Step 4: **Customize the Mac OS X desktop and set preferences.**
You can quickly make the desktop look the way you want using System Preferences, your command center for most settings on your MacBook Air. Choose Apple () > System Preferences from the menu bar or click the System Preferences icon in the Dock.
Important: You can set an option to reset your password in Users & Groups preferences, in case you forget your login password. For help with system preferences, open Help Center and search for “system preferences” or for the specific preference you want help for.

Getting Additional Information onto Your MacBook Air
Your MacBook Air comes with several applications installed, including the iLife suite. Many other applications can be downloaded from the Mac App Store or the Internet. If you want to install third-party applications from a DVD or CD, you can:

• Install applications onto your MacBook Air or share information using the optical disc drive on another Mac or PC (if DVD or CD Sharing is set up and enabled). For more information, see the next section.

• Attach the MacBook Air SuperDrive (an external USB optical disc drive available separately at www.apple.com/store) to the USB port on your MacBook Air, and insert your installation disc.

Setting Up DVD or CD Sharing
You can partner your MacBook Air with another Mac or PC that has an optical disc drive and is on the same wired or wireless network. Use this other computer to:

• Migrate information to your MacBook Air after setup using Migration Assistant (for information about using Migration Assistant, open Help Center and search for “Migration Assistant”)

• Share the contents of DVDs or CDs or install applications (see the next section)
The computer with the optical drive can be a Mac with Mac OS X v10.4.11 or later, or a Windows 7, Windows XP, or Windows Vista computer. If the Mac has Mac OS X v10.5.3 or later, DVD or CD Sharing is already installed. You can partner with more than one other computer, but you can use only one partner computer at a time.

If the other computer is a PC or a Mac with a Mac OS X version earlier than 10.5.3, download the DVD or CD Sharing Setup software for your partner computer:

- If the other computer is a PC, go to support.apple.com/kb/DL112 and download the DVD or CD Sharing Setup for Windows installer.
- If the other computer is a Mac with Mac OS X v10.4.11–10.5.2, go to support.apple.com/kb/DL113 and download the DVD or CD Sharing Setup for Mac Installer.

After you download the software, follow the steps in the next section to enable DVD or CD Sharing, or read detailed instructions in support.apple.com/kb/HT1777.
**Important:** After you install the DVD or CD Sharing Setup package on your other Mac, make sure you have the latest software by choosing Apple () > Software Update. Install any available Mac OS X updates.

**Sharing Discs with DVD or CD Sharing**
You can enable DVD or CD Sharing on a Mac or PC to use the Remote Disc feature of MacBook Air. Remote Disc allows you to share the discs you insert into the optical disc drive of the other computer. Some discs, such as DVD movies and game discs, may be copy-protected and therefore unusable through DVD or CD Sharing.

Make sure DVD or CD Sharing is already set up on any Mac or PC you want to partner with. For information, see page 15.

**To enable DVD or CD Sharing, if your other computer is a Mac:**
1. Make sure your MacBook Air and the other Mac are on the same wireless network.
   On the other Mac, choose Apple () > System Preferences and then open Sharing.
2. In the Sharing pane, select “DVD or CD Sharing” in the Service list. If you want other users to request permission to share a DVD or CD, select “Ask me before allowing others to use my DVD drive.”

**To enable DVD or CD Sharing, if your other computer is a PC:**
1. Make sure your MacBook Air and the PC are on the same wireless network.
2. On the PC, open the DVD or CD Sharing control panel.
3. Select “Enable Remote DVD or CD.” If you want other users to request permission to share a DVD or CD, select “Ask me before allowing others to use my DVD drive.”
To use a shared DVD or CD:

1. On the other computer, insert a DVD or CD into the optical disc drive.

2. On your MacBook Air, select Remote Disc when it appears under Devices in the Finder sidebar. If you see the “Ask to use” button, click it.

3. On the other computer, when prompted, click Accept to allow your MacBook Air to use the DVD or CD.

4. On your MacBook Air, use the disc as you normally would once it becomes available.

If you try to shut down the other computer or eject the shared DVD or CD while your MacBook Air is using it, you see a message telling you that the disc is in use. To proceed, click Continue.

Putting Your MacBook Air to Sleep or Shutting It Down

When you finish working with your MacBook Air, you can put it to sleep or shut it down.

Putting Your MacBook Air to Sleep

If you’ll be away from your MacBook Air for only a short time, put it to sleep. When it’s in sleep, you can quickly wake it and bypass the startup process.

To put your MacBook Air to sleep, do one of the following:

- Close the display.
- Choose Apple () > Sleep from the menu bar.
- Press the power button () and click Sleep in the dialog that appears.
- Choose Apple () > System Preferences, click Energy Saver, and set a sleep timer.
To wake your MacBook Air:

- *If the display is closed*, simply open it to wake your MacBook Air.
- *If the display is already open*, press the power button (⌘) or any key on the keyboard.

When your MacBook Air wakes from sleep, your applications, documents, and computer settings are exactly as you left them.

**Shutting Down Your MacBook Air**

If you aren’t going to use your MacBook Air for an extended period of time, it’s best to shut it down.

**To shut down your MacBook Air, do one of the following:**

- Choose Apple () > Shut Down from the menu bar.
- Press the power button (⌘) and click Shut Down in the dialog that appears.

If you plan to store your MacBook Air for an extended period of time, see “Important Handling Information” on page 59 for information about how to prevent your battery from draining completely.
Life with Your MacBook Air
Basic Features of Your MacBook Air

- FaceTime camera
- Camera indicator light
- Stereo speakers (under keyboard)

Ports on Your MacBook Air

- MagSafe power port
- Microphone
- USB 2.0 port
- Headphone port
- Thunderbolt port
- SD card slot
### MagSafe power port
Plug in the included 45W MagSafe Power Adapter to recharge the MacBook Air battery.

### USB (Universal Serial Bus) 2.0 ports
Connect a MacBook Air SuperDrive, USB to Ethernet adapter, iPod, iPhone, iPad, mouse, keyboard, printer, disk drive, digital camera, joystick, modem, and more to your MacBook Air.

### Headphone port
Connect external speakers and headphones.

### Built-in microphone
Capture sounds with the microphone (located on the left side, next to the headphone port) or talk with friends live over broadband using the included FaceTime application.

### Thunderbolt port (high-speed data, video, and audio)
Connect Thunderbolt-compatible devices for high-speed data transfer, or connect an external display that uses Mini DisplayPort. You can purchase adapters to connect displays that use DVI, HDMI, or VGA.

### SD card slot
Easily transfer photos, videos, and data to and from your MacBook Air with an SD or SDXC card.

**Note:** Adapters and other accessories are sold separately at www.apple.com/store or your local Apple Retail Store.
Using the Multi-Touch Trackpad

Use the trackpad to move the pointer and to perform a variety of Multi-Touch gestures. Unlike typical trackpads, the entire MacBook Air trackpad is a button, and you can click anywhere on the trackpad. To enable Multi-Touch gestures, view instructional videos of the gestures, and set other trackpad options, choose Apple () > System Preferences, and then click Trackpad.

Here are ways to use your MacBook Air trackpad:

- *Two-finger scrolling* lets you drag to scroll quickly up, down, or sideways in the active window.
Secondary-clicking or “right-clicking” lets you access shortcut menu commands.

To set up two-finger secondary-clicking anywhere on the trackpad, select “Secondary click” in the Point & Click pane of Trackpad preferences.

![Secondary-click zone]

To set up a one-finger secondary-click zone in the bottom left or right corner of the trackpad, select “Secondary click” in the Point & Click pane of Trackpad preferences, and choose an option from the pop-up menu.

Note: You can also secondary-click by holding down the Control key while you click.
The following trackpad gestures work in certain applications. When you perform these gestures, slide your fingers lightly on the surface of the trackpad. For more information, see Trackpad preferences or choose Help > Help Center and search for “trackpad.”

- *Two-finger pinching* lets you zoom in or out on PDFs, images, photos, and more.

- *Two-finger rotating* lets you rotate photos, pages, and more.
• *Three-finger swiping* works in the Finder and all applications. Swiping three fingers to the left or right lets you cycle through full-screen applications. Swiping three fingers up opens Mission Control. You can also set these options to work with four fingers.

![Three-finger swiping diagram]

• *Four-finger pinching* displays Launchpad when you pinch your thumb and three fingers together. Spread the same fingers apart to return to the desktop.

![Four-finger pinching diagram]

*Note:* You can specify other functions for many gestures. For details about all available gestures, choose Apple () > System Preferences, and then click Trackpad. Click the checkboxes to turn gestures on or off, and explore the pop-up menus to see the options for each gesture.
Running Your MacBook Air on Battery Power
When the MagSafe power adapter isn’t connected, your MacBook Air draws power from its built-in battery. The length of time that you can run your MacBook Air varies, depending on the applications you use and the external devices connected to your MacBook Air.

Turning off features such as Wi-Fi or Bluetooth® wireless technology and reducing screen brightness can help conserve battery charge. Many of your system preferences are automatically set to optimize battery life.

Charging the Battery
You can determine whether the battery needs to be charged by looking at the indicator light on the MagSafe connector. If the light is glowing amber, the battery needs to be charged. If the light is glowing green, the battery is fully charged.

You can also check the amount of battery charge left by viewing the Battery status icon in the menu bar. The battery charge level displayed is based on the amount of power left in the battery with the applications, peripheral devices, and system settings you are currently using. To conserve battery power, close applications and disconnect peripheral devices not in use, and adjust your Energy Saver settings. For more information about battery conservation and performance tips, go to www.apple.com/batteries/notebooks.html.

When the power adapter that came with your MacBook Air is connected, the battery recharges whether the computer is on, off, or in sleep. The battery recharges more quickly, however, when the computer is off or in sleep.
The battery in your MacBook Air can be replaced only by an Apple Authorized Service Provider or at an Apple Retail Store.

Getting Answers
Much more information about using your MacBook Air is available in Help Center, and on the Internet at www.apple.com/support/macbookair.

To get help from Help Center:
1 Click the Finder icon in the Dock (the bar of icons along the edge of the screen).

2 Click the Help menu in the menu bar and do one of the following:
   • Type a question or term in the Search field, and choose a topic from the results list or choose Show All Help Topics to see all topics.
   • Choose Help Center to open the Help Center window, where you can browse or search topics.
## More Information

Problem, Meet Solution
Occasionally, you may have problems while working with your MacBook Air. Read on for troubleshooting tips to try when you have a problem. You can also find more troubleshooting information in Help Center and on the MacBook Air Support website at www.apple.com/support/macbookair.

If you experience a problem with your MacBook Air, there’s usually a simple and quick solution. Think about the conditions that led up to the problem. Making a note of things you did before the problem occurred will help you narrow down possible causes and find the answers you need. Things to note include:

- The applications you were using when the problem occurred. Problems that occur only with a specific application might indicate that the application is not compatible with the version of the Mac OS installed on your MacBook Air.
- Any new software that you installed, especially software that added items to the System folder.

**An Ounce of Prevention**

If you have a problem with your computer or software, having kept up-to-date Time Machine backups ensures that your data won’t be lost. If you make regular Time Machine backups, you can restore your software and all your data to exactly the way it was at the time of the backup. Even serious issues are of less concern when you safeguard your information with Time Machine.
Problems That Prevent You from Using Your MacBook Air

If your MacBook Air doesn’t respond or the pointer doesn’t move

On rare occasion, an application might “freeze” on the screen. Mac OS X provides a way to quit a frozen application without restarting the computer.

To force an application to quit:

1 Press Command (⌘)-Option-Esc or choose Apple () > Force Quit from the menu bar. The Force Quit Applications dialog appears with the application selected.

2 Click Force Quit.

The application quits, leaving all other applications open.

If you need to, you can also restart the Finder from this dialog.

Next, restart your MacBook Air to make sure the problem is entirely cleared up.

If the problem occurs frequently, choose Help > Help Center from the menu bar at the top of the screen. Search for the word “freeze” to get help for times when the computer freezes or doesn’t respond.

If the problem occurs only when you use a particular application, check with the application’s manufacturer to see if the application is compatible with your MacBook Air. To get information for the software that came with your MacBook Air, go to www.apple.com/downloads.

If you know an application is compatible, you might need to reinstall the application.
If your MacBook Air freezes during startup, or you see a flashing question mark, or the display is dark

The flashing question mark usually means that your MacBook Air can’t find the system software on the internal flash storage or on any external disks that are attached.

Wait a few seconds. If your MacBook Air still doesn’t start up, shut it down by holding down the power button () for about 8 to 10 seconds. Disconnect all external peripherals and try restarting by pressing the power button () while holding down the Option key. When your MacBook Air starts up, click the internal flash storage icon, and then click the right arrow. After it starts up, open System Preferences and click Startup Disk. Select a local Mac OS X system folder.

If your MacBook Air doesn’t turn on or start up

Try the following suggestions in order until your MacBook Air turns on:

• Make sure the power adapter is plugged into your MacBook Air and into a functioning power outlet. Be sure to use the 45W MagSafe Power Adapter that came with your MacBook Air. If the power adapter stops charging and you don’t see the indicator light on the power adapter turn on when you plug in the power cord, try unplugging and replugging the power cord to reseat it.

• Check whether the battery needs to be recharged. If the light on the power adapter glows amber, the battery is charging. See “Charging the Battery” on page 32.

• If the problem persists, reset the MacBook Air power manager (while still preserving your files) by pressing the left Shift key, left Option key, left Control key, and the power button () simultaneously for five seconds until your MacBook Air restarts.
• Press and release the power button () and immediately hold down the Command (⌘), Option, P, and R keys simultaneously until you hear the startup sound a second time. This resets the parameter RAM (PRAM).

• If you still can’t start up your MacBook Air, see “Learning More, Service, and Support” on page 50 for information about contacting Apple for service.

If the screen suddenly goes black or your MacBook Air freezes
Try restarting your MacBook Air.

1 Unplug any devices that are connected to your MacBook Air, except the power adapter.

2 Press the power button () to restart the system.

3 Let the battery charge to at least 10 percent before plugging in any external devices and resuming your work.

To see how much the battery has charged, look at the Battery status icon () in the menu bar.

The screen might also darken if you have energy saver features set for the battery.

If your MacBook Air can’t connect to another computer’s optical disc drive
To use services such as Migration Assistant, DVD or CD Sharing, and iTunes music sharing, both your MacBook Air and the other computer must be connected to the same network. If your MacBook Air is connected wirelessly and the other computer is connected to a third-party router by Ethernet, check your router documentation to make sure it supports bridging a wireless to wired connection.
Repairing, Restoring, or Reinstalling Mac OS X Software
If you have a problem with your Mac software or hardware, Mac OS X provides repair and restore utilities that may eliminate problems and can even restore your software to its original factory settings. You can access these utilities from the Mac OS X Utilities application, even if your computer isn’t starting up correctly.

Use the Mac OS X Utilities application to:
• Repair your computer’s disk using Disk Utility.
• Restore your software and data from a Time Machine backup.
• Reinstall Mac OS X and Apple applications.

• Restore your computer to its factory settings by erasing its disk and reinstalling Mac OS X and your Apple applications.

If your computer detects a problem, it opens the Mac OS X Utilities application automatically. You can also open it manually by restarting your computer.

**To open the Mac OS X Utilities application:**
- Restart your computer while holding down the Command (⌘) and R keys. The Mac OS X Utilities pane appears.

*Important:* If the Mac OS X Utilities application doesn’t open after restarting, hold down Command (⌘)-Option-R and restart the computer to access the Mac OS X Utilities software from the Internet. Your computer must be connected to a network that has access to the Internet.

Some utilities in the Mac OS X Utilities application require access to the Internet and the Mac App Store. You may need to make sure your computer is connected to the Internet by using your Ethernet or Wi-Fi network.

**To connect by using a Wi-Fi network:**
1. Choose a network from the Wi-Fi status menu in the upper right corner of the screen.
2. If necessary, type the network password.

To join a closed network, choose Join Other Network. Enter the network’s name and password.
Repairing a Disk with Disk Utility

If you have a problem with your computer, or if you start your computer and see the Mac OS X Utilities application, you may need to repair your computer’s disk.

1. Select Disk Utility in the Mac OS X Utilities pane and click Continue.
2. Select the disk or partition in the list on the left, and then click the First Aid tab.
3. Click Repair Disk.

If Disk Utility can’t repair the disk, back up as much of your information as possible, and then follow the instructions in “Reinstalling Mac OS X and Apple Applications” on page 45.

For information about Disk Utility and its options, see Help Center, or open Disk Utility (in the Utilities folder in Launchpad) and choose Help > Disk Utility Help.

Restoring Information Using a Time Machine Backup

If you previously created a Time Machine backup, use the Restore utility to restore everything on your computer to its previous state.

Use your Time Machine backup to restore information only to the computer that was the source of the backup. If you want to transfer information to a new computer, use Migration Assistant (in the Utilities folder in Launchpad).

1. If your backup is on a Time Capsule, make sure you’re connected to an Ethernet or Wi-Fi network. (To connect to a Wi-Fi network, follow the instructions on page 43.)
2. In the Mac OS X Utilities pane, select Restore From Time Machine Backup and click Continue.
3. Select the disk that contains the Time Machine backup, and then follow the onscreen instructions.
Reinstalling Mac OS X and Apple Applications
Under some circumstances, you may need to reinstall Mac OS X and Apple applications. You can reinstall while keeping your files and user settings intact.

1. Make sure your MacBook Air is connected to the Internet by using an Ethernet or Wi-Fi network. (To connect to a Wi-Fi network, follow the instructions on page 43.)
2. In the Mac OS X Utilities pane, select Reinstall Mac OS X and click Continue.
3. In the pane where you’re asked to select a disk, select your current Mac OS X disk (in most cases, it is the only one available).
4. To select or deselect optional software, click Customize.
5. Click Install.

You can install Mac OS X without erasing the disk, which saves your existing files and settings, or you can erase the disk first, which erases all your data and leaves the computer ready for you to reinstall Mac OS X and Apple applications.

After installing Mac OS X, you can go to the Mac App Store and re-download your Apple applications.

**Important:** Apple recommends that you back up the data on the disk before restoring software. Apple is not responsible for any lost data.

Restoring Your Computer to Its Factory Settings
When you restore your computer to its factory settings, everything on your computer (your user accounts, network settings, and all of your files and folders) is deleted. Before you restore, back up any files you want to keep by copying them to another disk. Write down your network settings from Network preferences to make it easier to get connected again after reinstalling Mac OS X.
1 Make sure your MacBook Air is connected to the Internet by using an Ethernet or Wi-Fi network. (To connect to a Wi-Fi network, follow the instructions on page 43.)

2 In the Mac OS X Utilities pane, select Disk Utility and click Continue.

3 Select the disk in the list on the left, and then click the Erase tab.

4 Select Mac OS Extended (Journaled) from the Format pop-up menu, type a name for the disk, and then click Erase.

5 After the disk is erased, choose Disk Utility > Quit Disk Utility.

6 In the Mac OS X Utilities pane, select Reinstall Mac OS X and click Continue.

7 To reinstall Mac OS X and your applications, follow the instructions in the Mac OS X Installer.

After restoring Mac OS X and your Apple applications, you can selectively restore your other data and applications from a Time Machine backup.

Checking for a Hardware Problem

If you suspect a hardware problem, use the Apple Hardware Test application to help determine if there’s a problem with one of the MacBook Air components, such as the memory or processor.

To use Apple Hardware Test:

1 Disconnect all external devices from your MacBook Air except the power adapter.

2 Restart your MacBook Air while holding down the D key.

3 When the Apple Hardware Test chooser screen appears, select the language you want to use.

4 Press the Return key or click the right arrow button.
5 When the Apple Hardware Test main screen appears (after about 45 seconds), follow the onscreen instructions.

6 If Apple Hardware Test detects a problem, it displays an error code. Make a note of the error code before pursuing support options. If Apple Hardware Test doesn’t detect a hardware failure, the problem may be software related.

**Important:** If the Apple Hardware Test doesn’t appear after restarting, hold down Option-D and restart the computer to access the Apple Hardware Test software from the Internet. Your computer must be connected to a network that has access to the Internet.

**Problems with Your Internet Connection**
Your MacBook Air has a Network Setup Assistant application to help you set up an Internet connection. Open System Preferences and click Network.

Click the “Assist me” button to open Network Setup Assistant.

If you have trouble with your Internet connection, try using Network Diagnostics.

**To use Network Diagnostics:**
1 Choose Apple () > System Preferences.
2 Click Network and then click “Assist me.”
3 Click Diagnostics to open Network Diagnostics.
4 Follow the onscreen instructions.
If Network Diagnostics can’t resolve the problem, there may be a problem with the Internet service provider (ISP) you are trying to connect to, with an external device you are using to connect to your ISP, or with the server you are trying to access.

If you have two or more computers sharing an Internet connection, be sure that your wireless network is set up properly. You need to know if your ISP provides only one IP address or if it provides multiple IP addresses, one for each computer.

If only one IP address is provided, then you must have a router capable of sharing the connection, also known as network address translation (NAT) or “IP masquerading.”

For setup information, check the documentation provided with your router or ask the person who set up your network. You can use an AirPort base station to share one IP address among multiple computers. For information about using an AirPort base station, check Help Center or visit the Apple AirPort website at www.apple.com/support/airport.

If you cannot resolve the issue using these steps, contact your ISP or network administrator.

**Problems with Wi-Fi Communication**

If you have trouble using Wi-Fi (wireless communication):

- Make sure the computer or network you’re trying to connect to is running and has a wireless access point.

- Make sure you’ve properly configured the software according to the instructions that came with your base station or access point.
• Make sure you’re within range of the other computer or the network’s access point. Nearby electronic devices or metal structures can interfere with wireless communication and reduce this range. Repositioning or rotating the computer might improve reception.

• Check the Wi-Fi status icon (ʁ) in the menu bar. Up to four bars appear, indicating signal strength. If signal strength is low, try changing your location.

• Get help online by choosing Help > Help Center, and then searching for “wi-fi.” Also see the instructions that came with the wireless device for more information.

Keeping Your Software Up to Date
You can connect to the Internet and automatically download and install the latest free software versions, drivers, and other enhancements from Apple.

When you’re connected to the Internet, Software Update checks to see if any updates are available. You can set your MacBook Air to check for updates periodically, and download and install updated software.

To check for updated software:

1  Choose Apple () > System Preferences.

2  Click the Software Update icon and follow the onscreen instructions.

• For more information, search for “Software Update” in Help Center.

• For the latest information about Mac OS X, go to www.apple.com/macosx.

You’ll also get notices from the Mac App Store when application updates are available. A small number indicating the number of updates appears on the right edge of the App Store icon. You can update one or more applications at a time.
Learning More, Service, and Support

Your MacBook Air does not have any user-serviceable or user-replaceable parts. If you need service, contact Apple or take your MacBook Air to an Apple Authorized Service Provider. You can find more information about your MacBook Air through online resources, onscreen help, System Information, and Apple Hardware Test.

Online Resources
For online service and support information, go to www.apple.com/support and choose your country from the pop-up menu. You can search the AppleCare Knowledge Base, check for software updates, or get help from Apple’s discussion forums.

Onscreen Help
You can often find answers to your questions, as well as instructions and troubleshooting information, in Help Center. Choose Help > Help Center.

System Information
To get information about your MacBook Air, use System Information. It shows you what hardware and software is installed, the serial number and operating system version, how much memory is installed, and more. To open System Information, choose Apple () > About This Mac from the menu bar and then click More Info.

AppleCare Service and Support
Your MacBook Air comes with 90 days of technical support and one year of hardware repair warranty coverage at an Apple Retail Store or an Apple-authorized repair center, such as an Apple Authorized Service Provider. You can extend your coverage by purchasing the AppleCare Protection Plan. For information, visit www.apple.com/support/products or visit the website address for your country listed later in the section.
If you need assistance, AppleCare telephone support representatives can help you with installing and opening applications, and basic troubleshooting. Call the support center number nearest you (the first 90 days are complimentary). Have the purchase date and your MacBook Air serial number ready when you call.

Your 90 days of complimentary telephone support begins on the date of purchase.

Locating Your Product Serial Number

Use one of these methods to find your MacBook Air serial number:

- Turn over your MacBook Air. The serial number is etched into the case near the hinge.

- Choose Apple () > About This Mac. Click the version number beneath the words “Mac OS X” to cycle through the Mac OS X version number, the build version, and the serial number.

- Open System Information (in the Utilities folder in Launchpad). In the Contents pane, click Hardware.
Last, but Not Least
For your safety and that of your equipment, follow these rules for handling and cleaning your MacBook Air and for working more comfortably. Keep these instructions handy for reference by you and others.

**NOTICE:** Incorrect storage or use of your MacBook Air may void the manufacturer’s warranty.

---

**Important Safety Information**

**WARNING:** Failure to follow these safety instructions could result in fire, electric shock, or other injury or damage.

**Built-in battery** Do not remove the battery from your MacBook Air. The battery should be replaced only by an Apple Authorized Service Provider. Discontinue use of your MacBook Air if it’s dropped or appears crushed, bent, deformed, or damaged. Do not expose your MacBook Air to extreme heat sources, such as radiators or fireplaces, where temperatures might exceed 212°F or 100°C.

**Proper handling** The bottom of your MacBook Air may become very warm during normal use. The MacBook Air complies with the user-accessible surface temperature limits defined by the International Standard for Safety of Information Technology Equipment (IEC 60950-1).
To operate the computer safely and reduce the possibility of heat-related injuries, follow these guidelines:

- Set up your MacBook Air on a stable work surface that allows for adequate air circulation under and around the computer.
- Do not operate your MacBook Air on a pillow, blanket, or other soft material, because the material can block the airflow vents.
- Never place anything over the keyboard when operating your MacBook Air.
- Do not push objects into the ventilation openings.
- If your MacBook Air is on your lap and gets uncomfortably warm, remove it from your lap and place it on a stable work surface.

**Water and wet locations** Keep your MacBook Air away from sources of liquid, such as drinks, washbasins, bathtubs, shower stalls, and so on. Protect your MacBook Air from dampness or wet weather, such as rain, snow, and fog.

**45W MagSafe Power Adapter** Use only the power adapter that came with your MacBook Air, or an Apple-authorized power adapter that is compatible with this product. Make sure the AC plug or AC power cord is fully inserted into the power adapter before plugging the adapter into a power outlet.

The power adapter may become very warm during normal use. The MagSafe Power Adapter complies with the user-accessible surface temperature limits defined by the International Standard for Safety of Information Technology Equipment (IEC 60950-1).
To reduce the possibility of overheating the power adapter or of heat-related injuries, do one of the following:

- Plug the power adapter directly into a power outlet.

- If you’re using the AC power cord, place the power adapter on a desk, table, or on the floor in a well-ventilated location.
Disconnect the power adapter and disconnect any other cables if any of the following conditions exists:

- You want to clean the case (use only the recommended procedure described on page 60).
- The power cord or plug becomes frayed or otherwise damaged.
- Your MacBook Air or power adapter is exposed to rain, excessive moisture, or liquid spilled into the case.
- Your MacBook Air or power adapter has been dropped, the case has been damaged, or you suspect that service or repair is required.

The MagSafe power port contains a magnet that can erase data on a credit card, iPod, or other device. To preserve your data, do not place these or other magnetically sensitive material or devices within 1 inch (25 mm) of this port.

If debris gets into the MagSafe power port, remove it gently with a dry cotton swab.

**MagSafe power specifications:**

- **Frequency:** 50 to 60 Hz, single phase
- **Line Voltage:** 100 to 240 V
- **Output Voltage:** 14.5 V DC, 3.1 A
**Hearing damage** Permanent hearing loss may occur if earbuds or headphones are used at high volume. You can adapt over time to a higher volume of sound that may sound normal but can be damaging to your hearing. If you experience ringing in your ears or muffled speech, stop listening and have your hearing checked. The louder the volume, the less time is required before your hearing could be affected. Hearing experts suggest that to protect your hearing:

- Limit the amount of time you use earbuds or headphones at high volume.
- Avoid turning up the volume to block out noisy surroundings.
- Turn the volume down if you can’t hear people speaking near you.

**High-risk activities** This computer is not intended for use in the operation of nuclear facilities, aircraft navigation or communications systems, air traffic control systems, or for any other uses where a failure of the computer system could lead to death, personal injury, or severe environmental damage.
Important Handling Information

NOTICE: Failure to follow these handling instructions could result in damage to your MacBook Air or other property.

Operating environment Operating your MacBook Air outside these ranges may affect performance:
- *Operating temperature*: 50° to 95° F (10° to 35° C)
- *Storage temperature*: -4° to 113° F (-20° to 45° C)
- *Relative humidity*: 5% to 90% (noncondensing)
- *Operating altitude*: 0 to 10,000 feet (0 to 3048 meters)

Carrying your MacBook Air If you carry your MacBook Air in a bag or briefcase, make sure that there are no loose items (such as paper clips or coins) that could accidentally get inside the computer through vent openings or get stuck inside a port. Also, keep magnetically sensitive items away from the MagSafe power port.

Using connectors and ports Never force a connector into a port. When connecting a device, make sure the port is free of debris, that the connector matches the port, and that you have positioned the connector correctly in relation to the port.

Handling glass parts Your MacBook Air contains glass components, including the display and trackpad. If they are damaged, don’t use your MacBook Air until it has been repaired by an Apple Authorized Service Provider.
Storing your MacBook Air  If you are going to store your MacBook Air for an extended period of time, keep it in a cool location (ideally, 71°F or 22°C) and discharge the battery to 50 percent. When storing your computer for longer than five months, discharge the battery to approximately 50 percent. To maintain the capacity of the battery, recharge the battery to 50 percent every six months or so.

Cleaning your MacBook Air  When cleaning the outside of your MacBook Air and its components, first shut down your MacBook Air, and then unplug the power adapter. Then use a damp, soft, lint-free cloth to clean the MacBook Air exterior. Avoid getting moisture in any openings. Do not spray liquid directly on the computer. Do not use aerosol sprays, solvents, or abrasives that might damage the finish.

Cleaning the MacBook Air screen  To clean your MacBook Air screen, first shut down your MacBook Air and unplug the power adapter. Then use a soft, lint-free cloth dampened with just water and wipe the screen. Do not spray liquid directly on the screen.
Understanding Ergonomics
Here are some tips for setting up a healthy work environment.

Keyboard and Trackpad
When you use the keyboard and trackpad, your shoulders should be relaxed. Your upper arm and forearm should form an angle that is slightly greater than a right angle, with your wrist and hand in roughly a straight line.

Use a light touch when typing or using the trackpad and keep your hands and fingers relaxed. Avoid rolling your thumbs under your palms.
Change hand positions often to avoid fatigue. Some computer users might develop discomfort in their hands, wrists, or arms after intensive work without breaks. If you begin to develop chronic pain or discomfort in your hands, wrists, or arms, consult a qualified health specialist.

**External Mouse**
If you use an external mouse, position the mouse at the same height as the keyboard and within a comfortable reach.

**Chair**
An adjustable chair that provides firm, comfortable support is best. Adjust the height of the chair so your thighs are horizontal and your feet are flat on the floor. The back of the chair should support your lower back (lumbar region). Follow the manufacturer’s instructions for adjusting the backrest to fit your body properly.

You might have to raise your chair so that your forearms and hands are at the proper angle to the keyboard. If this makes it impossible to rest your feet flat on the floor, you can use a footrest with adjustable height and tilt to make up for any gap between the floor and your feet. Or you can lower the desktop to eliminate the need for a footrest. Another option is to use a desk with a keyboard tray that’s lower than the regular work surface.
Built-In Display
Adjust the angle of the display to minimize glare and reflections from overhead lights and windows. Do not force the display if you meet resistance. The display is not designed to open past 135 degrees.

You can adjust the brightness of the screen when you take the computer from one work location to another, or if the lighting in your work area changes.

More information about ergonomics is available on the web:

www.apple.com/about/ergonomics

Apple and the Environment
Apple Inc. recognizes its responsibility to minimize the environmental impacts of its operations and products.

More information is available on the web:

Regulatory Compliance Information

FCC Compliance Statement
This device complies with part 15 of the FCC rules. Operation is subject to the following two conditions: (1) This device may not cause harmful interference, and (2) this device must accept any interference received, including interference that may cause undesired operation. See instructions if interference to radio or television reception is suspected.

L'utilisation de ce dispositif est autorisée seulement aux conditions suivantes: (1) il ne doit pas produire de brouillage et (2) l'utilisateur du dispositif doit être prêt à accepter tout brouillage radioélectrique reçu, même si ce brouillage est susceptible de compromettre le fonctionnement du dispositif.

Radio and Television Interference
This computer equipment generates, uses, and can radiate radio-frequency energy. If it is not installed and used properly—that is, in strict accordance with Apple’s instructions—it may cause interference with radio and television reception.

This equipment has been tested and found to comply with the limits for a Class B digital device in accordance with the specifications in Part 15 of FCC rules. These specifications are designed to provide reasonable protection against such interference in a residential installation. However, there is no guarantee that interference will not occur in a particular installation.

You can determine whether your computer system is causing interference by turning it off. If the interference stops, it was probably caused by the computer or one of the peripheral devices.

If your computer system does cause interference to radio or television reception, try to correct the interference by using one or more of the following measures:

• Turn the television or radio antenna until the interference stops.
• Move the computer to one side or the other of the television or radio.
• Move the computer farther away from the television or radio.
• Plug the computer in to an outlet that is on a different circuit from the television or radio. (That is, make certain the computer and the television or radio are on circuits controlled by different circuit breakers or fuses.)

If necessary, consult an Apple Authorized Service Provider or Apple. See the service and support information that came with your Apple product. Or consult an experienced radio/television technician for additional suggestions.

Important: Changes or modifications to this product not authorized by Apple Inc. could void the EMC compliance and negate your authority to operate the product.

Responsible party (contact for FCC matters only):
Apple Inc. Corporate Compliance
1 Infinite Loop, MS 26-A
Cupertino, CA 95014

Wireless Radio Use
This device is restricted to indoor use when operating in the 5.15 to 5.25 GHz frequency band.

Cet appareil doit être utilisé à l’intérieur.

この製品は、周波数帯域 5.18 〜 5.32 GHz で動作しているときは、屋内においてのみ使用可能です。

Exposure to Radio Frequency Energy
The radiated output power of the AirPort Extreme technology is below the FCC and EU radio frequency exposure limits. Nevertheless, it is advised to use the wireless equipment in such a manner that the potential for human contact during normal operation is minimized.

FCC Bluetooth Wireless Compliance
The antenna used with this transmitter must not be colocated or operated in conjunction with any other antenna or transmitter subject to the conditions of the FCC Grant.
Bluetooth Industry Canada Statement
This Class B device meets all requirements of the Canadian interference-causing equipment regulations.

Cet appareil numérique de la Class B respecte toutes les exigences du Règlement sur le matériel brouilleur du Canada.

Industry Canada Statement
Complies with the Canadian ICES-003 Class B specifications.
Cet appareil numérique de la classe B est conforme à la norme NMB-003 du Canada. This device complies with RSS 210 of Industry Canada.

Bluetooth Europe—EU Declaration of Conformity
This wireless device complies with the R&TTE Directive.

Europe—EU Declaration of Conformity

Español Por medio de la presente Apple Inc. declara que este MacBook Air cumple con los requisitos esenciales y cualesquiera otras disposiciones aplicables o exigibles de la Directiva 1999/5/CE.

Ελληνικά Με την παρούσα, η Apple Inc. δηλώνει ότι αυτή η συσκευή MacBook Air συμμορφώνεται προς τις βασικές απαιτήσεις και τις λοιπές σχετικές διατάξεις της Οδηγίας 1999/5/ΕΚ.

Français Par la présente Apple Inc. déclare que l’appareil MacBook Air est conforme aux exigences essentielles et aux autres dispositions pertinentes de la directive 1999/5/CE.

Italiano Con la presente Apple Inc. dichiara che questo dispositivo MacBook Air è conforme ai requisiti essenziali ed alle altre disposizioni pertinenti stabilite dalla direttiva 1999/5/CE.

Islenska Apple Inc. lýsir því hér með því að þetta tæki MacBook Air fullnægir lágmarkskröfum og öðrum viðeigandi ákvæðum Evróputilskipunarár 1999/5/EC.

Nederlands Hierbij verklaart Apple Inc. dat het toestel MacBook Air in overeenstemming is met de essentiële eisen en de andere bepalingen van richtlijn 1999/5/EG.

Polski Niniejszym Apple Inc. oświadcza, że ten MacBook Air są zgodne z zasadniczymi wymogami oraz pozostałymi stosownymi postanowieniami Dyrektywy 1999/5/EC.
Português  Apple Inc. declara que este dispositivo MacBook Air está em conformidade com os requisitos essenciais e outras disposições da Directiva 1999/5/CE.

Română  Prin prezenta, Apple Inc. declară că acest aparat MacBook Air este în conformitate cu cerințele esențiale și cu celelalte prevederi relevante ale Directivei 1999/5/CE.

Slovensko  Apple Inc. izjavlja, da je ta MacBook Air skladne z bistvenimi zahtevAMI in ostalimi ustreznimi določili direktive 1999/5/ES.

Slovensky  Apple Inc. týmto vyhlasuje, že toto MacBook Air splňa základné požiadavky a všetky príslušné ustanovenia Smernice 1999/5/ES.

Suomi  Apple Inc. vakuuttaa täten, että tämä MacBook Air tyypin laite on direktiivin 1999/5/EY oleellisten vaatimusten ja sitä koskevien direktiivin muiden ehtojen mukainen.

Svenska  Härmed intygar Apple Inc. att denna MacBook Air står i överensstämmelse med de väsentliga egenskapskrav och övriga relevanta bestämmelser som framgår av direktiv 1999/5/EG.

External USB Modem Information
When connecting your MacBook Air to the phone line using an external USB modem, refer to the telecommunications agency information in the documentation that came with your modem.

ENERGY STAR® Compliance
As an ENERGY STAR® partner, Apple has determined that standard configurations of this product meet the ENERGY STAR® guidelines for energy efficiency. The ENERGY STAR® program is a partnership with electronic equipment manufacturers to promote energy-efficient products. Reducing energy consumption of products saves money and helps conserve valuable resources.

This computer is shipped with power management enabled with the computer set to sleep after 10 minutes of user inactivity. To wake your computer, click the mouse or trackpad button or press any key on the keyboard.

For more information about ENERGY STAR®, visit: www.energystar.gov

Disposal and Recycling Information
This symbol indicates that your product must be disposed of properly according to local laws and regulations. When your product reaches its end of life, contact Apple or your local authorities to learn about recycling options.

For information about Apple's recycling program, go to: www.apple.com/recycling.

European Union—Disposal Information
The symbol above means that according to local laws and regulations your product should be disposed of separately from household waste. When this product reaches its end of life, take it to a collection point designated by local authorities. Some collection points accept products for free. The separate collection and recycling of your product at the time of disposal will help conserve natural resources and ensure that it is recycled in a manner that protects human health and the environment.

Türkiye
EEE yönetmeliğine (Elektrikli ve Elektronik Eşyalarda Bazı Zararlı Maddelerin Kullanımının Sınırlandırılmasıına Dair Yönetmelik) uygundur.

Brasil—Informações sobre descarte e reciclagem
O símbolo acima indica que este produto e/ou sua bateria não devem ser descartadas no lixo doméstico. Quando decidir descartar este produto e/ou sua bateria, faça-o de acordo com as leis e diretrizes ambientais locais. Para informações sobre o programa de reciclagem da Apple, pontos de coleta e telefone de informações, visite www.apple.com/br/environment.

Battery Disposal Information
Dispose of batteries according to your local environmental laws and guidelines.

Nederlands: Gebruikte batterijen kunnen worden ingeleverd bij de chemokar of in een speciale batterijcontainer voor klein chemisch afval (kca) worden gedeponeerd.

O: 表示该有毒有害物质在该部件所有均质材料中的含量均在 SJ/T 11363-2006 规定的限量要求以下。
X: 表示该有毒有害物质至少在该部件的某一均质材料中的含量超出 SJ/T 11363-2006 规定的限量要求。

根据中国电子行业协会 SJ/T11364-2006 和相关的中国政府法规，本产品及其某些内部或外部组件上可能带有环保使用期限标识。取决于组件和组件制造商，产品及其组件上的使用期限标识可能有所不同。组件上的使用期限标识优先于产品上任何与之相冲突的或不同的环保使用期限标识。
